01 Brand Overview

About ZeroX

ZeroX is an IT product development company founded in 2026 by Rahul S, headquartered in Tamil Nadu, India. We specialize in building innovative software products that push boundaries — from zero to extraordinary.

Our focus is on crafting high-quality, performance-driven applications across media technology, education platforms, and developer tools. Every product we ship reflects our commitment to engineering excellence and thoughtful design.

FOUNDER

Rahul S

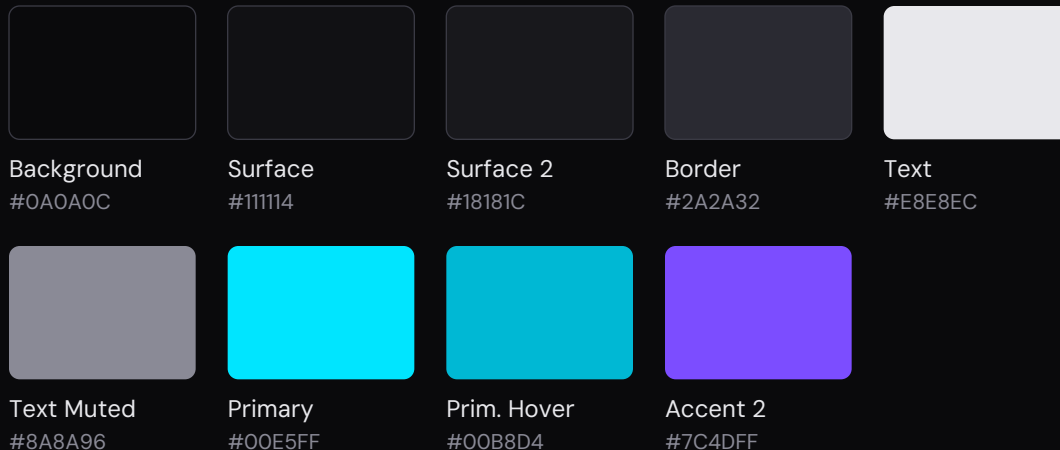

CEO & Lead Engineer

MISSION

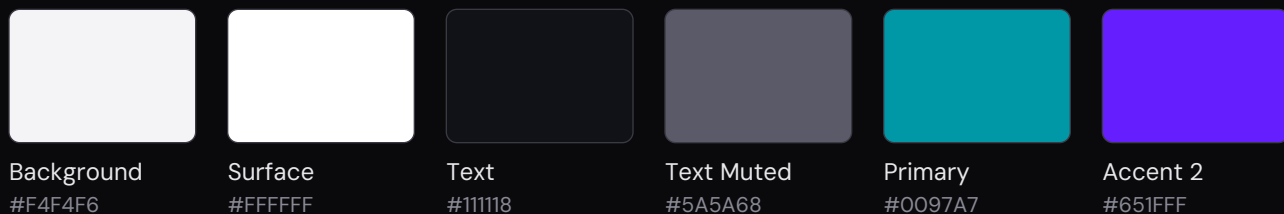

To engineer innovative software products that transform ideas from concept to reality — with precision, quality, and purpose.

02 Color Palette

Dark Mode — Primary

Light Mode

Usage Guidelines

- › **Primary (Cyan)**
Use for interactive elements, CTAs, links, and key accents.
- › **Accent 2 (Purple)**
Use sparingly for secondary highlights and gradients.
- › **Background/Surface**
Layer surfaces to create depth — never flatten the hierarchy.
- › **Text hierarchy**
Use Text for primary content, Text Muted for secondary info.

03 Typography

DISPLAY / HEADINGS

Cabinet Grotesk

Source: Fontshare · Weights: 700 (Bold), 800 (ExtraBold)

Use for all display text, page titles, section headings, and hero text.

ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 0123456789

BODY

Satoshi

Source: Fontshare · Weights: 400 (Regular), 500 (Medium), 700 (Bold)

Use for body copy, paragraphs, descriptions, UI labels, and navigation.

ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 0123456789

MONOSPACE / CODE

JetBrains Mono

Source: Google Fonts · Weights: 400 (Regular), 500 (Medium)

Use for code snippets, terminal output, file paths, and technical data.

ABCDEFGHIJKLMNOPQRSTUVWXYZ 0123456789 { } [] () < > / = + -

Type Scale

Display	48–72px	Cabinet Grotesk 800
H1	36–48px	Cabinet Grotesk 700
H2	24–32px	Cabinet Grotesk 700
Body	16–18px	Satoshi 400/500
Caption	12–14px	Satoshi 400
Code	14–16px	JetBrains Mono 400

04 Brand Voice

Our voice defines how ZeroX communicates across all touchpoints — from product interfaces to marketing materials to documentation.

● Technical but Accessible

We speak the language of engineers, but we never exclude. Complex ideas are explained clearly. Jargon is used with purpose, not posturing.

● Confident, Not Arrogant

We stand behind our work with quiet conviction. No hype, no superlatives without substance. Let results speak, not adjectives.

● Precision-Focused

Every word is intentional. We value clarity over cleverness, specificity over vagueness. If something can be said in fewer words, it should be.

“

We let our products speak for themselves.

— ZeroX Brand Principle

Voice Guidelines

Do

- Use clear, direct language
- Back claims with data or evidence
- Write for developers first, then everyone
- Be concise and purposeful
- Show, don't just tell

Don't

- Use buzzwords without context
- Oversell or exaggerate capabilities
- Be condescending or exclusionary
- Use passive voice when active is clearer
- Sacrifice clarity for cleverness

05 Products Overview

Our product lineup showcases ZeroX's engineering capabilities across media technology, next-gen interfaces, and education platforms.

MEDIA TECHNOLOGY

LuminaPlayer

Active Development

An AI-powered media player built with Java and libVLC, featuring a Python sidecar for intelligent media analysis and enhancement.

Java · libVLC · Python Sidecar · AI Integration

NEXT-GEN MEDIA

Astra Player

Active Development

The next-generation evolution of our media technology — rebuilt from the ground up with PySide6/Qt6, spanning over 7,000 lines of refined code.

PySide6 · Qt6 · Python · 7,000+ Lines

EDUCATION PLATFORM

Lab Viva Assistant

Active Development

A secure online examination platform designed for lab viva assessments, built on Flask with a focus on integrity and ease of use.

Flask · Python · Web Platform · Secure Auth

All products are developed in-house by ZeroX. More projects coming soon.
